SUMMARY

Senior PHP Developer with 14+ years of experience building scalable, high-performance backend systems, specializing in fintech payment platforms and enterprise SaaS. Currently developing payment gateway integrations and financial operations logic for Paymentico, a global fintech platform, at Mayflower.

Core expertise in PHP, Laravel, RESTful API design, MySQL, PostgreSQL, Redis, Elasticsearch, AWS, Docker, and Nginx, applied through SOLID principles, design patterns, and Domain-Driven Design. Previous experience includes privacy-compliance infrastructure for CCPA/GDPR-regulated SaaS (Clarip), architecture refactoring for a banking transactions platform (PrePay), and leading development of the largest auto classifieds platform in Azerbaijan (MashinAL).

SKILLS

Languages: PHP 8, SQL, JavaScript, Node.js

Frameworks & Libraries: Laravel, Laravel Nova, Phalcon, Doctrine ORM, PHPUnit, Vue.js, Vuex

Databases: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, ACID Transactions, Query Optimization, Indexing (B-Tree), Stored Procedures

Architecture: RESTful API, Microservices, Domain-Driven Design (DDD), CQRS, MVC, OOP, SOLID, Design Patterns, Message Queues

DevOps & Monitoring: Amazon Web Services (AWS), Docker, Nginx, Linux, Shell Scripting, Supervisor, Git, Git Flow, Composer, Kibana, Grafana

Domains: Fintech, Payment Systems, Payment Gateway Integration, Banking, SaaS, Data Privacy (GDPR, CCPA)

EXPERIENCE

Senior PHP Developer — Mayflower

Limassol, Cyprus (Remote) | Dec 2025 – Present

- Integrate global and regional payment gateways into the Paymentico fintech platform, ensuring secure and reliable transaction flows for merchants worldwide.
- Reduce payment processing latency by redesigning CRUD APIs and service-package logic for complex financial operations.
- Cut complex query execution times through deep database performance tuning across transactional and analytical workloads.
- Build and enhance administrative control panels and monitoring tools, and resolve critical integration blockers to keep the platform stable and data consistent.

Senior PHP Developer — Clarip

Philadelphia, Pennsylvania, US (Remote) | Dec 2022 – Dec 2025

- Built core features of an enterprise privacy-management SaaS platform, ensuring compliance with CCPA, GDPR, ePrivacy, and other data privacy regulations.
- Designed and implemented scalable, secure, high-performance solutions for complex privacy requirements across diverse industries.
- Delivered tailored client solutions by collaborating with legal, compliance, and customer success teams.
- Integrated analytics and reporting tools, giving clients actionable insights into their privacy management processes.

Senior PHP Developer — PrePay Electronic Payments

Ramat-Gan, Israel (Remote) | Aug 2021 – Dec 2022

- Shipped 20+ new product features, improving user experience and the product's market competitiveness.
- Led a full refactoring of the application architecture, improving performance and scalability for growing transaction volumes.
- Integrated banking transaction providers, ensuring secure and efficient payment processing.
- Built account opening, transaction management, bill payments, payment control, invoicing, document generation, and e-signature functionality.

Lead PHP Developer — BestComp Group

Baku, Azerbaijan | Sep 2019 – Aug 2021

- Led the development team of MashinAL (mashin.al), Azerbaijan's leading auto catalog and classifieds platform.
- Expanded the region's most comprehensive vehicle catalog, including technical specifications, modifications, and generations.
- Directed technical development to improve site performance, user experience, and data management.
- Aligned the product roadmap with market demand by collaborating with cross-functional teams.

Senior PHP Developer — InvestAZ Securities Inc

Baku, Azerbaijan | Jun 2014 – Mar 2019

- Built new websites and projects, expanding the company's digital portfolio and market reach.
- Maintained and extended existing websites with new features, improving functionality and user engagement.
- Developed the second version of the company's CRM, automating parts of production processes and generating periodic financial reports for accounting, government agencies, tax authorities, and the national bank.

Middle PHP Developer — Start Interactive Agency

Baku, Azerbaijan | Apr 2012 – May 2014

- Developed new websites and projects for agency clients.
- Maintained and improved existing websites, adding features to enhance user experience and meet client requirements.
- Collaborated closely with the team to solve technical issues and deliver effective solutions.

EDUCATION

Baku State University (BSU)

Baku, Azerbaijan

OPEN SOURCE PROJECTS

Interact With Enum — github.com/kongulov/interact-with-enum

PHP trait with helper methods for working with native PHP enums.

Nova Tab Translatable — github.com/kongulov/nova-tab-translatable

Laravel Nova package that makes any field type translatable with tabs.
